

Sprint 5 Release Plan

Generally speaking, the tasks that will be accomplished during Sprint 4 are related to:

- Request board, notification board, discussion board, event board, and offers board.
- Cross-Platform access.
- Multilingual support.
- External account authentication.

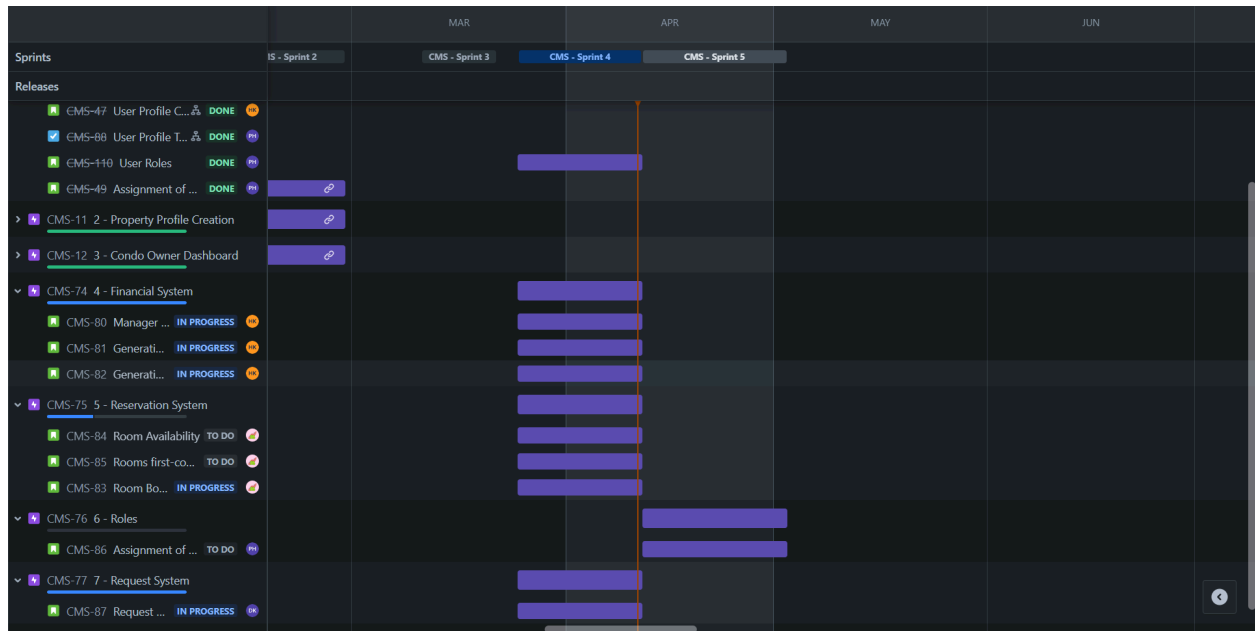

Diving deep into each user story:

- 1) “Request Board”: condo owners can submit a request for moving in/out, intercom changes, reporting a violation, reporting a deficiency and/or asking any questions so that necessary action and assistance can be taken by the management.
- 2) “Notification Board”: User can follow the latest activities by accessing a notification page.
- 3) “Discussion Board”: User can communicate with others within the community.
- 4) “Event Board”: User can organize events and invite other occupants and can also accept or reject invites for other events.
- 5) “Offers Board”: The manager can list coupons/offers for unit owners or rental users for a specific property.
- 6) “Cross-Platform access”: User can access the system on Android, iOS, Linux, MacOS, and Windows so that he has the freedom to use any device.
- 7) “Multilingual support”: User has the option to use the app in English and at least one other language so that the app can be more accessible to everyone.
- 8) “External account authentication”: User has the option to log in using his Gmail account or other such email account so that he can access the app seamlessly without creating a new set of credentials.

User Story ID	User Story Points (USP)	Priority	Status
Notification Board (CMS-103)	3	Medium	TODO
Discussion Board (CMS-104)	4	High	TODO
Event Board (CMS-105)	4	High	TODO
Offers Board (CMS-106)	4	Medium	TODO
Cross-Platform access (CMS-107)	3	Medium	TODO
Multilingual support (CMS-108)	2	Low	TODO
External account authentication (CMS-109)	2	Low	TODO
Total USP	22		

The user story points were chosen based on 2 factors: difficulty of implementation and importance of implementation (how important it is to have this feature).

Future deployment plans: Microsoft Azure
